SS-CR NON-LATCH TYPE STINGER SEAL ASSEMBLY

Model SS-CR NON-LATCH TYPE Stinger Seal Assembly is a tubing conveyed latching seal assembly that is used to operate the sleeve-valve in an WSB-CR Cement retainer previously set on wireline line. The SS-CR should always be run with a TC-1 Tubing Centralizer to provide for easier entry into the Cement retainer.

FEATURES

Provide positive control when the work string is picked up to close the sleeve-valve. Re-engages each time the work string is lowered to open sleeve-valve.

Helps prevent seal from pumping out during pumping operations or tubing testing.

One size operates several sizes of retainers.

Rotate or Snap-out release.

Can Run with Baker type Cement Retainers.

One company at the center of the energy revolution is uniquely equipped with the know-how and ingenuity to make possibilities happen—SERVAgroup.com
