FLUTED CENTRALIZER

The Fluted Centralizer is designed to be included as part of the coiled tubing workstring, to assist in providing centralization to allow easier location of tools during fishing, or to provide general stability in the tubing.

The Fluted Centralizer has a full flow through bore allowing passage of darts or drop balls and is available in any specific length.

DESIGN FEATURES/BENEFITS

- ▶ Full flow through bore.
- ▶ Solid one piece construction.

SERVA Specification Guide Fluted Centralizer			
Max OD (in)	Min ID (in)	Thread	Part Number
